

Brief CV

Name	Guofeng Lu	中文名	卢国锋	
Gender	Male	Title (Pro./Dr.)	PH.D	
Position (President...)	No	Country	China	
University/ Department	Weinan Normal University/College of Chemistry and Material			
Personal Website	No			
Research Area	Ceramic matrix composites and Ferroelectric ceramics			

Brief introduction of your research experience:

Guofeng Lu, PH.D/Associate Professor, a teacher in College of Chemistry and Material in Weinan Normal University. My research experience was initiated from the research of of the casting process of metal materials in1995. In 2001, I began to be engage in the research of structural ceramic materials and produced zirconium oxide foam ceramics that can withstand the impact of the molten metal with the temperature of 1700°C. In 2005, I was involved in the research of the ceramic composite materials, mainly engaged in the research on the preparation and oxidation resistance of carbon fiber reinforced ceramic matrix composites. The following year, I was involved in the preparation and performance of the ferroelectric ceramics. At present, a total of more than 30 papers have been published in SCI and EI journal, three provincial research projects had been presided, and two major national research projects had been participated in.
